- Product Issues
 - ADABAS 621
 - ADABAS 711
 - Entire Connection 412
 - SAGA Information
 - Configuration Management
 - Y2K Issues
 - Miscellaneous Information
- Final Comments

Product List

Core Products

- ADABAS 6.2.1
- Natural 2.2.8++
- Predict 3.4.1
- Entire Network 5.5.1

Optional Products

- Supernatural 3.1.5
- PAC 2.1.2
- Review 4.1.2
- Natural Advanced Facility 2.2.8
- Entire Broker 2.1.1
- Entire Connection 3.1.2.1
- Native SQL 1.6.2
- ADABAS Transfer 5.1
- Connect 3.2.2
- Natural VSAM 2.3.2
- APPC (Entire X) 4.2.1
- APAS/Insight (Non-SAG) 3.4.1
- Trim (Not SAG) 6.1.0
- Construct 4.1.1

ADABAS 6.2.1

- EW ADA621-013 Announced 1/25/2000
 - Only used in VM/CMS systems
- ADADBS DELCP problem with TODATE parm
 - New Format under 621 to be used is YYYYMMDD not YYMMDD
 - In some instances YYMMDD will either:
 - Run correctly
 - Abend with Natural Response code 64
 - Proper response should be with Response Code 64.
 - May require zap AN21079 to correct logic

ADABAS 7.1.1

- Received 2/1/2000
- Installation and Review of product started
- Highlights of 711 given in past Vits Material
 - 7/99 and 12/99
 - If desired I can resend this info to anyone who needs it.

ENTIRE CONNECTION 412

- Questions
 - Downloading to EXCEL seems to be twice as slow as before.
 - PCC 4.1.2 Fix02 is addressing this problem
 - Not released on 1/31 when I talked to Denver

SAGA Information

- **ADABAS 7 & Natural 3 (Latest Information)**
 - ADABAS 7 (Received 2/2000)
 - Natural 3.x (1st Quarter 2000)

Configuration Management

- Purpose of Question Asked
 - Audit Findings require 6 months of source code history
 - No requirement by which this is done
- GSFC Evaluation Status
 - Endeavor & Other Products

Configuration Management

- Where do we go from here?
 - Pursue & Recommend an agency-wide solution?
 - Continue to use what's in place at each center
 - Products Used:
 - PAC (Predict Application Control) is used by MSFC(SESAAAS), HQ, SSC, and ARC
 - We have an agency level license for PAC - NO additional cost is incurred for the use of PAC
 - Other Products being Used?

Y2K Issues

- Natural Logon Security Records
 - Problem: Natural Logon Record format changed under Year 2000.
 - Kept records after Y2K Roll-over are different than those of 1900. Results in mismatches if trying to delete records that span years.
 - No Conversion utility provided so any customized program may have problems.
 - Online Utility will only allow 19XX or 2000 records to be queried or updated, cannot mix them.

Miscellaneous Information

- Web Addresses of Interest from SAG-L
 - Free Scan & library source statistics utilities - Scroll to bottom of page and look for "Click Here" buttons to download zip files
 - <http://www.fbo-sabresoft.com/pandora.htm>
 - The Scan utility features multiple (20) search strings, absolute/non-absolute scan, multiple "ignore" strings, cross-database and library access etc. etc.
 - Also available on the same web page is a Library (Source) Statistics utility (ls.zip).
 - Bottom of Page contains various hot lists, SAG Related list contains some interesting sites.
